

Walter Quattrociocchi, Ph.D.

He is Head of the Laboratory of Computational Social Science at IMT Lucca since 2014. His research focuses on the (mis)information spreading, the emergence of collective narratives in online social media as well as on their relation with the opinion evolution. He has published more than 40 peer-reviewed scientific papers in major journals and conferences. His findings about misinformation spreading, confirmation bias and echo chambers received an impressive interest from the media and international institutions.
